I'll call you back but you have answered my question. The R4 NPDES program has not published anything in the federal register related to aquaculture activities.

Hi Natalie.

I just called you to discuss. I am not sure that I understand your questions.

The marine aquaculture permits in federal waters will be issued under an individual permit. Individual NPDES permits do not require notice in the federal register, only a public notice in the appropriate places such as our website, newspapers, and notification to interested parties. I am responsible for public noticing the documents.

Let me know if you need more information.

Subject: Aquaculture FRN

Hi Craig,

I wanted to know who served as your FR Docket Manager when the NPDES announced plans to permit the aquaculture facilities such as the Manna Fish Farms, Inc. off the coast of Pensacola, FL and Kampachi Farms, LLC off the coast of Sarasota, FL. I know Rol Ferry of my staff was involved in gathering and reviewing information that was to be used in the development of the NEPA analysis and agency consultation documents.

Who was your docket manager for the publishing of the FRN for aquaculture matters last year and this year?

Thanks,

Natalie
